

DR ANTHONY HORTON

BEnvSc. (Hons.) PhD (Env Sc.) MRACI CChem PGrad Dip OHS Grad Dip Carbon Management Cert IV TAE

Chairman of The Climate Change Guy Group

International authority on environmental protection

One of the worlds most qualified climate change experts

UNITED NATIONS CONFERENCE ON CLIMATE CHANGE

30 NOVEMBER TO 11 DECEMBER 2015

PARIS - LE BOURGET, FRANCE

www.cop21.gouv.fr/en

Providing expert opinion and insight during this upcoming global summit, Dr Anthony Horton is available for commentary and consultation on a range of climate change issues, and would be delighted to share his knowledge and expertise on the topics raised during this international event.

A Perth-based thought leader and strategist at the forefront of the climate change and environmental science frontier, Anthony is a highly sought-after consultant who regularly travels throughout Australasia as an environmental advisor to international government bodies and business corporations.

With a thorough understanding of the science behind climate change and its real-world implications in addition to the politics that surround it in both domestic Australian and international contexts, he has actively analysed the commitments of a number of nations and written articles that have been well received and shared across the globe.

Dedicated to defining the practical realities of changing environmental factors, and driven by his desire to inspire worldwide willingness to accept and address the challenges and opportunities that climate change presents, Anthony is in an informed position to assess what new weather and atmospheric perspectives mean for Australia and the world.

If you would like to enhance your communications by providing your audience with analysis and reflection from one of the most qualified climate change experts in the world, Anthony welcomes your requests for commentary on any environmental subjects of discussion raised before, during and after the 2015 United Nations Conference on Climate Change.
